## EXPERIENCE

### Php Full Stack Web Developer Intern at IDS

2023-2024

- Created an Activity Club Portal with tailored interfaces for admin, guide, and users, improving engagement and event management using PHP, HTML, CSS, JavaScript, Bootstrap, and MySQL.
- Improved PHP skills, focusing on dynamic web development and MySQL database management, including CRUD operations.
- Advanced understanding of object-oriented programming (OOP) in PHP via project application.
- Enhanced teamwork through collaborative code reviews and project management tools, boosting PHP expertise and team performance.

### .Net Full Stack Web Developer Intern at IDS

June 2023 – August 2023

- Contributed to developing a Meeting Room Booking System using ASP.NET/MVC and SQL Server.
- Assisted in adding interactive features to web pages with JavaScript and jQuery, boosting frontend development experience.
- Supported the creation of WebAPIs for better website integration, focusing on user experience and teamwork.

### Technical Customer Support Intern at Alfa

June 2023 – July 2023

- Engaged in diverse Technical Customer Support (TCS) activities, sharpening operational problem-solving and enhancing customer interaction skills.
- Acquired hands-on technical support experience, focusing on direct customer engagement and service protocols.
- Developed a thorough understanding of daily operations and problem-resolution techniques within technical support.
- Applied theoretical knowledge effectively, resulting in refined support processes and enhanced problem-solving capabilities.

### General Internship at Nokia

July 2022 – August 2022

- Acquired a general overview of the various departments within Nokia and gained basic technical knowledge of Nokia's products and portfolio during the internship.
- 

## PROJECTS

- Launched a PHP Beauty Center web application to boost customer interaction and online presence.
  - Built a PHP Medical Center Website enhancing healthcare access and updating appointment processes.
  - Developed a PHP supermarket web application improving user experience and product management.
  - Designed a Java-based mobile app for a pasta shop in Android Studio, using SQLite to enhance menu navigation and customer feedback.
  - Crafted a cross-platform boat rental application with Flutter and Firestore, optimizing user experience and simplifying booking process.
  - Built a Mental health website using React, Node.js, and PostgreSQL featuring self-assessment, therapy sessions, blogs, journals, workshops, and educational resources.
- 

## IT SKILLS

- HTML, CSS, JavaScript, React, Bootstrap: Expertise in dynamic, responsive web design.
  - PHP, Node.js: Proficient in server-side scripting.
  - Java: Skilled in object-oriented programming, algorithms, and data structures.
  - SQL, MySQL, PostgreSQL, MongoDB: Experienced in database management and optimization.
  - AWS: Skilled in using Amazon Web Services.
  - Android Studio, Flutter: Capable of developing Android and cross-platform applications.
  - Python, Machine Learning: Intermediate in Python for machine learning model development.
  - Microsoft Office Suite: Proficient in Excel, PowerPoint for professional documentation.
-
